HYBRID VINYL & ALUMINUM

LanGuard privacy fencing seamlessly blends beauty with strength, offering an ideal fusion of aesthetics and durability. Crafted by combining woodgrain vinyl panels and a robust aluminum framework, LanGuard is an innovative product that incorporates the latest advances in technology from American Fence System.

Color appearance in photos and swatches can vary depending on lighting. For most accurate color, please request a sample.

## Superior Benefits Of LANGUARD FENCING

As a hybrid fencing product, LanGuard has clear advantages that make it the perfect solution for many applications. In addition to its stunning natural look, there are more benefits than meet the eye. The aluminum structure ensures lasting stability, while reinforced vinyl panels prevent warping due to thermal expansion. Climate resistance ensures minimal care and long-term durability. Proudly American-made, LanGuard is a quality product built to last.

### **NATURAL BEAUTY**

Enjoy the look of real wood with LanGuard, but with minimal upkeep. Our technology ensures a beautiful, maintenance-free fence that complements any setting.

### **STRONG FRAME**

Our aluminum frame fencing combines strength with elegance. It's designed for durability, offering superior structural integrity with a sophisticated look.

### **DURABLE PANELS**

Every other tongue and groove panel is reinforced with an aluminum insert, dramatically increasing strength to prevent warping over time.

### **LOW MAINTENANCE**

LanGuard is a combination of our Landmark Vinyl and Vanguard Aluminum fence brands, creating a long lasting product that doesn't require frequent upkeep.

### **WEATHER RESISTANT**

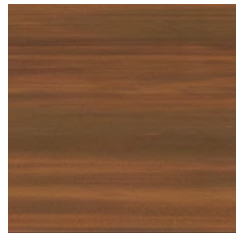

Our fences are built to withstand extreme conditions, featuring UV-resistant vinyl and powder-coated aluminum. LanGuard stays strong and looks great, no matter the weather.

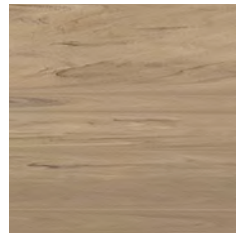

### **MADE IN THE USA**

Proudly, LanGuard fencing is manufactured in the United States. Supporting domestic craftsmanship creates a superior, dependable product for your home.
